DETAILED ACTION

SUPPLEMENTAL EXAMINER'S AMENDMENT

A supplemental examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant Richard Nemes on July 8, 2005.

This set of claims replaces all previously presented claims. The application has been amended as follows:

1. (Amended) A computer-implemented method comprising:

storing at least one acquisition specification of a first user represented in a scripting language that specifies acquisition requirements;

parsing the acquisition specification into at least one purchase form comprising a plurality of attributes, at least one of which specifying a transactional action desired to be electronically completed by the first user;

receiving over the Internet and storing offering specification comprising at least one vendor form comprising a plurality of attributes, at least one of which specifying a transactional action desired to be electronically completed by a second user; and

electronically determining if the attributes in the purchase form are compatible with associated attributes in the vendor form by testing attributes in the purchase form against attributes in the vendor form for satisfiability using a compatibility dictionary, comprising a storage of sets of compatible terms associated with an automated completion of a transaction, wherein the step of testing comprises accessing the storage of the dictionary and determining whether the transactional action in the purchase form is compatible with the transactional action in the vendor form,

wherein the storing the at least one acquisition specification is on a personal page assigned to a user providing the acquisition specification and said personal page communicates with Global Positioning System.

2. (Cancelled)

3. (Original) The method of claim 1 wherein the at least one offering specification comprises data represented by a scripting languages.

4. (Cancelled)

5. (Amended) The method of claim 1 wherein the offering specification is received at the location where the personal page with at least one acquisition specification is stored.

6. (Cancelled)

7. (Previously Presented) The method of claim 1 wherein the acquisition specification comprises data related to at least one advertisement.

8. (Cancelled)

9. (Amended) The method of claim 1 wherein voice recognition software is associated with the personal page and the acquisition specification is provided using voice input.

10. (Amended) The method of claim 1 wherein the acquisition specification is provided to the personal page using wireless communication.

11-36. (Cancelled)

Examiner's Comments

This supplemental Examiner's Amendment is being provided to clarify the status of the claims.

Allowable Subject Matter

Claims 1, 3, 5, 7, 9, and 10 are allowed.

The following is the Examiner's statement of reasons for allowance: Statement of allowance is in reference to independent claim 1. All other claims are dependencies of this independent claim.

The present application is directed to a computer-implemented method that stores an acquisition specification from a personal page of a first user, parses the specification into attributes, receives an offering specification from a second user and determines whether the attributes in the purchase form are compatible the attributes in the vendor form using a compatibility dictionary. The independent claim recites the uniquely patentable feature that the personal page assigned to the first user communicates with Global Positioning System.

Discussion of most relevant prior art:

The following references have been identified as the most relevant prior art to the claimed invention.

(i) Searcher et al. "*Intelligent agents: A primer*" hereinafter referred to as Searcher.

Searcher substantially discloses the claimed invention as noted in the previous Office Actions. However, Searcher does not teach or suggest that the personal page assigned to the first user communicates with Global Positioning System.

Art Unit: 3625

(ii) *US 6,522,875 B1* to Dowling et al. hereinafter referred to as Dowling. Dowling teaches a web browser that communicates with GPS. However, Dowling does not teach that a user's acquisition specification is stored on personal page.

(iii) *Japanese Patent Publication 2003-284120* to Kagaya hereinafter referred to as Kagaya. Kagaya teaches acquiring geometrical position of a mobile phone from a GPS satellite when a danger mode is activated. Kagaya does not teach or suggest that a personal page assigned to the first user communicates with Global Positioning System.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naeem Haq whose telephone number is (571)-272-6758. The examiner can normally be reached on M-F 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wynn W. Coggins can be reached on (571)-272-7159. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
